App Design

EDUCATION

University of Illinois at Urbana-Champaign
Bachelor of Science in Computer Science and Statistics
Graduated 2023

Logan Square Chamber of Commerce

FREELANCE UX/UI DESIGNER MARCH 2025 - PRESENT

- Led end-to-end redesign of the Chamber's website, improving usability for local businesses and residents.
- Conducted user research, stakeholder interviews, and analytics review to uncover navigation and engagement issues.
- Rebuilt site architecture and designed mobile-first prototypes in Figma, resulting in clearer user flows and improved mobile performance.
- Established a scalable visual system aligned with brand and accessibility standards.

UnBoxed

PRODUCT DESIGNER MARCH 2025 - APRIL 2025

- Designed a mobile app to simplify sustainable shopping by targeting key pain points like confusing navigation, unclear product info, and lack of community.
- Led the full UX process—from user interviews and competitive analysis to personas, user flows, and wireframes—culminating in a high-fidelity UI centered on transparency and trust.
- Introduced community features and streamlined checkout flow to boost user engagement and adoption of eco conscious products.

EBM Software

DATA ANALYST OCTOBER 2024 - DECEMBER 2024

- Redesigned Power BI dashboards based on user feedback to improve clarity and engagement (+20% usage).
- Automated schema validation in Python to automate data integrity checks, saving 10+ hours/week and freeing time for product testing and iteration.

JUNIOR DATA ANALYST JULY 2023 - OCTOBER 2024

- Led redesign and prototyped an internal web app with improved layout and navigation—resulting in 15% increased engagement.
- Partnered with developers to refine UI components in dashboards and reporting tools.
- Ran UX workshops and team training on data visualization and interface logic.
- Spearheaded a data-driven UX approach, leveraging user behavior insights and analytics to inform design decisions and optimize digital experiences, resulting in a 10% increase in user satisfaction.
